Last evening Davis and his intended bride left the Treffinger home and ostensibly started for church. Instead of attending the services at the village chapel, however, the couple made their way toward Hanoverton. The elopement had been privately planned and the anxious Nellie had consented to follow her lover, notwithstanding she knew her father was likely to intercept them if their object was discovered.

The old gentleman was on the alert. as the fleeing couple had little more than gotten beyond the outskirts of the village until he was saddling a horse and preparing to give chase. He was distanced, however, and Davis and his fiance reached the 'squire's office ahead of the irate father and were quickly united.

The ceremony had been completed but a few minutes when the horse bearing the father, who, it is reported, carried a shotgun, was seen dashing into town. The northbound train was just then pulling into the depot and Mr. and Mrs. Davis quickly stepped aboard and made their escape. They started for Toledo, where Mr. Davis is employed.

PLUGGING UP SEWERS

Health Officer Burgess Is Doing "Missionary" Work in the East End.

A sewer on Sycamore alley in the East End, which emptied in the creek at Mulberry street, was plugged up yesterday afternoon by Health Officer Burgess. Six families used the sewer and all are now left without any possible means of drainage.

Complaint has been made to the health authorities regarding the cesspool which formed at the mouth of years ago a colored girl was permitted the sewers and which created an obto work for her diploma, but was not noxious stench, and Mr. Burgess was compelled to abate the nuisance. There is no other outlet by which the families affected can attach their waste pipes, and all are in quandary as to what to do.

Evarts was one of the founders and first editor of that periodical. Physically Mr. Johnson is a slender young man, above medium height, with a frank and clean shaved boyish face.

In "Arrows of the Almighty" Owen Johnson attempts a task that has often wrecked older and more experienced writers. He tells the whole life history of his hero, an officer in the commissary department of the north during the civil war. The book covers a period of 50 years, from the twenties to the seventics. It includes an account of the contract scandals during the mighty struggle, and competent critics say that there is material enough for a book in this one episode of "Arrows of the Almighty." The same gentlemen agree that, although it is a very creditable piece of work, it has some minor faults. It needs condensation and shows want of a sense of proportion.

One of New York's literary papers says of "Arrows of the Almighty:" "For a student's work it is even remarkable. It is one of the few such works that merit serious attention. As yet Mr. Johnson has little sense of proportion. When he shall have understood the value of this in all work and shall have learned the art of condensation, he will undoubtedly find himself on the road to writing fiction of a high quality."

CONSTITUTION NOT ACCEPTED.

Platt Amendment Is Not Adopted According to Views of United States Government — Cuban Conservative Said Acceptance Was Meant.

Havana, June 1.—The decision of on the subject said in substance that monies. they had reason to suppose that the constitution would be acceptable to Washington and that otherwise they would not nave voted for the maprity report as submitted. They also pointed out that in order to avoid a possibility of rejection the majority report had been changed at the last moment by striking out the interpretation at the end of the clauses and putting therein the form of a resoluby themselves, thus accepting the Platt amendment as passed by congress

Intended to Accept.

"It is true," said one of the conservatives in question, "that the committee's interpretations of the explanations of the Teller resolution, which were offered by Governor General Wood and Secretary Root, together with the Washington commission's report, were included with the Platt amendment as an appendix to the substitution, but when we voted on the report it was with but one purpose in view, namely to accept the Platt amendment."

Both delegates expressed regret that a misunderstanding had arisen and said they doubted that the convention would now reconsider its action, as the fight had been hot, the victory had been won by only one vote, and those who had tried to do their duty toward their country had been bitterly assailed as traitors and perjurers.

Senores Capote and Tamayo had a long conference with General Wood last night.

General Wood, in the course of a brief interview, said:

"I never understood that the explanations of Secretary Root would e incorporated in the acceptance. I always considered that the convention regarded these explanations as explanations merely, and that they would not form part of the accept-

He tells the whole life history of his hero, an officer in the commissary department of the north during the civil war. The book covers a period of 50 years, from the twenties to the seventies. It includes an account of the contract scandals during the mighty struggle, and competent critics say that there is material enough for a book in mighty." The same gentlemen agree that, although it is a very creditable piece of work, it has some minor faults. It needs condensation and shows want of a sense of proportion.

One of New York's literary papers says of "Arrows of the Almighty:" "For a student's work it is even remarkable. It is one of the few such works that merit serious attention. As yet Mr. Johnson has little sense of proportion. When he shall have understood the value of this in all work and shall have learned the art of condensation, he will undoubtedly find himself on the road to writing fiction of a high quality."

CONSTITUTION NOT ACCEPTED.

Platt Amendment Is Not Adopted According to Views of United States Government - Cuban Conservative Said Acceptance Was Meant.

Havana, June 1.—The decision of adopted by the Havana convention caused great surprise and keen disappointment to those members of the convention who voted in favor of the constitution as adopted. Two leading conservatives who were interviewed on the subject said in substance that monies. they had reason to suppose that the constitution would be acceptable to Washington and that otherwise they would not nave voted for the maprity report as submitted. They also peinted out that in order to avoid a possibility of rejection the majority report had been changed at the last moment by striking out the interpretation at the end of the clauses and putting therein the form of a resolution by themselves, thus accepting the Platt amendment as passed by

Intended to Accept.

"It is true," said one of the conservatives in question, "that the committee's interpretations of the explanations of the Teller resolution, which were offered by Governor General Wood and Secretary Root, together with the Washington commission's report, were included with the Platt amendment as an appendix to the substitution, but when we voted on the report it was with but one purpose in view, namely to accept the Platt amendment.

Both delegates expressed regret that a misunderstanding had arisen and said they doubted that the convention would now reconsider its action, as the fight had been hot, the victory had been won by only one vote, and those who had tried to do their duty toward their country had been bitterly assailed as traitors and

Senores Capote and Tamayo had a long conference with General Wood last night.

General Wood, in the course of a brief interview, said:

When Cats Were Worshiped.

A mummy cat is a very curious thing. Tons of these embalmed creatures were brought to England a few years ago to be ground into bone manure. What an unromantic ending load, supposed to contain 180,000 cats, very few really complete specimens could be found.

It is supposed that the cats were of the species known as Felis maniculata, a kind formerly found in north Africa, and principles of labor organizations. and probably tamed by the ancient Egyptians, from which we get our domesticated pussy.

As early as 1600 B. C. tablets recorded that cats were kept in the Egyptian temples as an object of worship.

Below is a story found in a recent book, "Talks With the Old English Cricketers," which prompts the reflection that "there were giants in those days" of the "old" cricketers.

A man who did a private business in athletic requisites at his home in Blackpool was one day approached by a man who asked him if he kept a full supply of cricket requisites. "Certainly," was the response.

"Then," said the man gravely, "wrap

ary Magazine, and at Yale. Lawrenceville is a celebrated "feeder" for Princeton, but Mr. Johnson chose Yale instead, where he was graduated last year. At Yale he obtained the highest university honors in letters, the chairmanship of the editorial board of The Vale Literary Magazine. The late William M. Evarts was one of the founders and first editor of that periodical. Physically Mr. Johnson is a slender young man, above medium height, with a frank and clean shaved boyish face.

In "Arrows of the Almighty" Owen Johnson attempts a task that has often wrecked older and more experienced writers. He tells the whole life history of his hero, an officer in the commissary department of the north during the civil war. The book covers a period of 50 years, from the twenties to the seventics. It includes an account of the contract scandals during the mighty struggle, and competent critics say that there is material enough for a book in this one episode of "Arrows of the Almighty." The same gentlemen agree that, although it is a very creditable piece of work, it has some minor faults. It needs condensation and shows want of a sense of proportion.

One of New York's literary papers says of "Arrows of the Almighty:" "For a student's work it is even remarkable. It is one of the few such works that merit serious attention. As yet Mr. Johnson has little sense of proportion. When he shall have understood the value of this in all work and shall have learned the art of condensation, he will undoubtedly find himself on the road to writing fiction of a high quality."

With a week's notice and with the prospect of important business propositions to be submitted for consideration, the board of trade meeting called for next Thursday evening should be a rousing one. The fact that the meeting had to be called off last evening on account of no quorum is no reflection on the organization or its officers. SEIZE THE OPPORTUNITY.

With a week's notice and with the prospect of important business propositions to be submitted for consideration, the board of trade meeting called for next Thursday evening should be a rousing one. The fact that the meeting had to be called off last evening on account of no quorum is no reflection on the organization or its offiton, is a guest at the home of Mr. cers. The date, by some error, was unfortunately set when the whole town had its time and attention fully occupied with the high school commencement. Next time, we believe, there will be a satisfactory attendance, and that all leading citizens will be there to show that they have public spirit and civic pride and are willing pany. to lend a hand to advance the material welfare of the city. Now, if ever, is the time to make a good start in this direction. The opportunity is ripe; let it be embraced.

a Bulletin. Washington, June 1.-The condition

of Mrs. McKinley was reported as unchanged last night from the status given in the bulletin issued during the morning. She failed to show any improvement during Friday. One of the grave features of the case is the fact that she continues extremely weak and fails to gain in strength. She is very seriously ill, but has had severe attacks of illness heretofore. and this gives rise for hope that she will yet show improvement. No bulletin was issued last night and none will be until after the consultation of the physicians today. Both Dr. Sternberg and Dr. Rixey called during the evening, at separate times, the latter remaining with the patient some little while.

The physicians who are in attendance upon Mrs. McKinley, after a consultation Friday forenoon, issued the 3 following statement of her condition:

'Mrs. McKinley is recovering from the fatigue of the trip. The illness from which she was suffering in San Francisco still continues, though in ging for the placing in position of a less intense form. She is still feeble and cannot be considered out of danger. Her progress will no doubt be slow, but improvement is looked

"I have made no statement at any time concerning the case of Mrs. Mc Kinley, other than those made in the official bulletins, published by Mr Cortelyou, and I have nothing further to say regarding the case.'

San Francisco, June 1.-Dr. Clinton Cushing, one of the physicians who attended Mrs. McKinley during her ill ness in this city, denied the report that the local physicians had said their patient was fatally ill, and Dr. Cushing declares that his associates and himself agreed that it would be better for Mrs. McKinley to return home, as her inclination was strongly that way; that, although she was not entirely out of danger, her physicians knew that she was a good traveler, and they foresaw no particular danger in the trip.

SEIZE THE OPPORTUNITY.

With a week's notice and with the prospect of important business propositions to be submitted for consideration, the board of trade meeting called for next Thursday evening should be a rousing one. The fact that the meeting had to be called off last evening on account of no quorum is no reflection on the organization or its officers. The date, by some error, was unfortunately set when the whole town had its time and attention fully occupied with the high school commencement. Next time, we believe, ville. there will be a satisfactory attendance, and that all leading citizens will be there to show that they have public spirit and civic pride and are willing pany. to lend a hand to advance the material welfare of the city. Now, if ever, is the time to make a good start in this direction. The opportunity is ripe; let it be embraced.

COMMENCEMENT DAY.

Commencement is past. As usual, it was a joyous occasion, and the exercises were of a meritorious order. n and women who receive ed diplomas last night listened to the program presented by the young people with pride and satisfaction. Teachers shared the feeling, for it was evident that their work had been well done. When the last oration had been spoken and the strains of music had died away and the lights were out way to their homes, school days closed and active life commenced, it is to be hoped that the high resolves which have carried them to success in school life were strengthened, and that each on the laurels won, but to make them- city. selves useful in the busy world which in the world there is a wide field and city. plenty of work for all who will work. strive and push onward or his diplo- Kensington. ma will be of no more value to him than so much waste paper.

There have been few parties induced to go to Ford City up to the present time, and it is doubtful if many go until assured employes will receive the prices at the time stalist The factory, it is said, is not now paying the scale, and until such time as it does there will be very few East Liverpool potters in the list of employes there.

The officials of the Brotherhood have every reason to believe, however, that the management at Ford City are sincere, and state that the plant may be operated under the uniform list before the first of July, but they are not encouraging workmen to go there until they are positive the list is being paid.

J. B. Geijsbeek, of Golden, Col., left this morning for his home, after securing the services of a kilnman and his brother Mr. Geijsbeek is engaged day in the manufacture of a fine grade of pottery, and they have recently increased the capacity of their plant so that it is necessary to add to the force. Farming machinery is a feature of the domestic business, and there is no sign decrease in the export movement of these products, which has attained enormous proportions. Rails are also going out freely to Australia and South America. Railways are unable to secure sufficient freight cars and other supplies, while structural work proceeds briskly with little interruption from labor controversies.

Extended holidays abroad and a short one in this country have tended to make the grain markets unusually quiet, while corn has had the added drawback of hesitation among traders who have not yet recovered from the effects of manipulation in the May option. inflated quotations. Each tion in wheat is quickly followed by recovery, and much support is found in gloomy reports from growing sections. Insufficient moisture and low temperature are the chief causes of complaint, and injury from insects is also rumored, but there is always more or less loss through these influences, and the splendid condition earlier in the season gives reason to hope for an abundant yield. Carpets and upholsteries improve, and in staple clothing woolens there is more activity. This brings out raw wool more freely, but there is not sufficient demand to advance prices in the face of heavy stocks and a large new clip coming forward. In fact, the accumulation of supplies has had a distinctly depressing influence, and in the Philadelphia market quotations are perceptibly easier. FIVE MEN LYNCHED.

Severe Penalty For Petty Stealing Suffered In California.

Out on Bail.

Bieber, Cal., June 1.-Details have been received here of the lynching of five men at Lookout, Modoc county. The lynched were Calvin Hall, 72 years of age; his three half-breed sons, Frank, James and Martin, aged respectively 26, 19 and 16, and B. D. Yantis, aged 2. The men lynched had been suspected of petty stealing for some time. They were arrested Satarday of last week. Stolen property was found in the houses and on the premises of Hall and Yantis, Sunday and for several days following.

The charge against the elder Hall was petty largeny, for stealing forks, hence he was allowed to go about on his own recognizance. The charges against the others was burgdary and their examinations had been set for June 3. They were held in custody, as they were unable to furnish bail in the sum of \$300. Pending their examination they were being guarded in the Lookout hotel by Constable Carpenter, assisted by R. Nichols, J. W. Brown and S. Goyette, each two relieving the others. Calwin Hall was stopping at the hotel so as to be near his sons.

FOR MOTHERS.

The period immediately following child-birth is fraught with

many dangers. The strength has been used in the painful ordeal through which the mother has passed and she finds herself helpless and weakened. Many mothers, like Mrs. Ford, date the beginning of their illness from the birth of their child. Indeed the frequent spectacle of a healthy young woman becoming a chronic invalid after motherhood is one of the tragedies of life. All this is unnecessary, when Wine of Cardul is obtainable. It rehabilitates the shattered nervous system, strengthens the organs and ligaments, and re-establishes a healthy, natural condition, saving years of chronic sickness and suffering. Wine of Cardui taken just before confinement will render the ordeal comparatively painless. It will re-enforce and strengthen the organs for their work. For every trying crisis in a woman's life, Wine of Cardui is the medicine to take. Ask your druggist for Wine of Cardui and take no substitute. D. Yantis, aged 2. The men lynched had been suspected of petty stealing for some time. They were arrested Satarday of last week. Stolen property was found in the houses and on the premises of Hall and Yantis, Sunday and for several days following.

The charge against the elder Hall was petty larceny, for stealing forks, hence he was allowed to go about on his own recognizance. The charges against the others was burgdary and their examinations had been set for June 3. They were held in custody, as they were unable to furnish bail in the sum of \$300. Pending their examination they were being guarded in the Lookout hotel by Constable Carpenter, assisted by R. Nichols, J. W. Brown and S. Goyette, each two relieving the others. win Hall was stopping at the hotel so as to be near his sons.

About 2 o'clock Friday morning a mob, variously estimated at from 30 to 50 people, suddenly made their apmearance at the hotel, and pointing their guns at the two officers on guard, commanded them to observe silence placed ropes around their necks and dragged them toward the bridge which crosses Pitt river. They compelled the two guards to accompany them. Frank Hall, it is reported, made such strong resistance that the mob hanged before it got to the main bridge, winder a small bridge crossing a deep salongh. The others were taken to the main bridge and Calvin Hall, the father, was hanged on the north side it resembled an old clothesline." and Yantis and the other Hall boys discovered word was telegraphed to the district attorney and sheriff at Alturas, and they, together with the coroner, were on the way to the scene of the tragedy to hold an in-

FOR MOTHERS.

The period immediately following child-birth is fraught with many dangers. The strength has been used in the painful ordeal through which the mother has passed and she finds herself helpless and weakened. Many mothers, like Mrs. Ford, date the beginning of their illness from the birth of their child. Indeed the frequent spectacle of a healthy young woman becoming a chronic invalid after motherhood is one of the tragedies of life. All this is unnecessary, when Wine of Cardul is obtainable. It rehabilitates the shattered nervous system, strengthens the organs and ligaments, and re-establishes a healthy, natural condition, saving years of chronic sickness and suffering.
Wine of Cardui taken just before confinement will render the ordeal comparatively painless. It will re-enforce and strengthen the organs for their work. For every trying crisis in a woman's life, Wine of Cardui is the medicine

There is one point where the American league is beating the National league all along the line, and every sportsman in the country is glad of itthat is, in the protection of its um-

Many of the club owners of the National organization fail to see the importance of the ruler of the play. They are not only hurting the game, but they are depriving themselves of increased gate receipts by their indifference.

Ban Johnson, the president of what might be termed the National league's "nightmare," has worked his way up from the bottom of the baseball ladder, and he probably understands more about the inside workings of the game than any other man connected with the National league, if we except possibly James Hart of Chicago. I have talked with several of the veteran umpires re-

cently, and they all say the same thing. They are given implicit instructions to carry out the rules, and when they do it they are called to account by some particular club owner whose favorite player has had his corns trodden upon by an umpire in the strict discharge of his duty.

There never was a better umpire in this country than Lynch, who knew baseball from beginning to end, and the players one and all respected him. Lynch was always fair and never played favorites. He was wanted for that reason by clubs when they were away from home simply because they knew that Lynch was entirely impartial, and no matter how much the mob howled he gave each decision as he saw it rewhen it came to a pinch the club owners refused to support Lynch, and he gave up in disgust.

There is one umpire in the ranks, however, who says that he proposes to stick to the indicators until he is fired out. Emslie has been in harness for many years and does as well as any man could hope to do under the distressing circumstances connected with umpiring for the big league. Bob does not know what fear means, and he simply carries out the rules as they are laid down to him.

Emslie, under pressure, for he is not much of a talker, said a few days ago that he thought the club owners made a mistake when they gave up the double umpire system. He admitted that it was impossible to do good work under present conditions.

The rumpus between Andy Freed-Milwaukee, 3: Washington, 3. (7) happened if two umpires had been on the field in that New York-Brooklyn the field in that New York-Brooklyn Detroit 9 to 0. Baltimore refusing thrown down the gauntlet to President thrown down the gauntlet to President forfeited game. Freedman has again Young and the other League owners, but nothing will come of it probably,

for he has done the same thing before. Much criticism has been heard about the respective pennant struggles in which the big leagues are engaged. Much concern is heard in the National camp about the fact that its American liberal restocking of streams and lakes important single event of the year, was rivals are so badly strung out. A by the government hatcheries scatter not given. The race is a classic, like month from now the conditions may .286 be different.

went to France, declining a \$10,000 contract which stipulated that he must race on the Sabbath.

Billy Sunday, the famous old outfielder of the Chicago club, refused to proved by the fact that he abandoned baseball to become an evangelist.

The raid of the American league has certainly played havoc with some of the older clubs. Boston feels the loss of Stahl, Duffy and Collins mightily. The present aggregation does not look like the old team, and nobody realizes it more than Selee. McGinnity has been missed more than was expected in Brooklyn, and so has Jones and Cross. Cross' desertion has left a hole in the Brooklyn's infield which has broken the heart of the average fan in the City of Churches and troiley cars.

Cincinnati and Pittsburg seem to have weathered the storm in better shape than any of the others. I asked Hanlon the other day what team he thought was the strongest outside of his own, and he answered without hesitation, "Cincinnati." He had not, however, run up against the Pittsburg Pirates at that time.

While Matthewson, the New York pitcher, is undoubtedly the find of the present season, he cannot hope to keep up the pace. Aleck Smith, his catcher, sometimes called the "Broadway fashion plate" because of his fondness for fine raiment and his persistence in promenading Broadway in the theatrical district on sunny afternoons, says: "Matthewson is about the speediest pitcher I ever held, and I have held a lot of them in my time. I tell you, when one of those shoots goes a little wild it certainly jars."

I met the ever genial Patrick T. Powers, president of the Eastern league, one day recently. P. T. was all smiles and reports that his clubs are doing well. He predicts one of the most exciting struggles for the pennant in the history of the organization. He says reports reaching him from the west state that the Western association is doing equally well.

Powers believes that there has been a positive revival of interest in baseball all over the country this year and says it will continue to the end of the season.

The Eastern, Western and American leagues were clever enough to refuse to adopt the changes in the rules as arranged by the National league. The rule preventing the batsmen from taking first when hit with a pitched ball was so ridiculous that it did not have even a trial.

Calling a strike on a foul tip is causing more or less confusion, and all sorts of rulings have been made, especially when there are men stealing bases when the foul tip is made. The foul tip rule shortens the game, and that is about all.

Fishermen Throughout the Country Enjoying Good Sport.

WITH ROD AND REEL.

Fishermen are now in the midst of the season's sport. From Maine to Florida, from New York to California, the reels are clicking and the lines are whirring.

Tuna fishing on the Pacific coast has assumed very gratifying proportions to the western votaries of the rod and reel. Several unusually large catches have been reported. The southern devotees of Izaak Walton are also in luck. Red snappers are very plentiful in many regions, and the gamy fish are biting voraciously. Hundreds of enthusiastic fishermen have flocked to the Florida haunts of the red snapper.

The streams about Philadelphia, Chicago and St. Louis are being well patronized. Members of some of the fishing clubs say that the fish are rising to flies better than has been the case for several years.

llow Canoeing Is Adapted to All Parts of the Country-The American Canoe Association and Its Work-Exposition Races.

Canoeing is one of the many attractive outdoor pastimes that are engaging a deal of public notice nowadays. Canoeing is adapted to all conditions favorable to aquatic sports, and its followers are multiplying yearly. One potent argument in favor of the

advancement of the interests of the picturesque but serviceable craft is the adaptability of the canoe to use in many quarters where craft of greater draft would be put out of commission by lack of natural facilities. Shallow waters and rocky river beds are constant menaces to navigation by row and sail boats, but the Indian's graceful birch bark invention may glide unharmed with the aid of skillful manipulation through the trickiest of chan-

To the inland inhabitant canoes are invaluable. By their means he can avail himself of delightful outings on brooks, lakes and rivers that would otherwise be denied to him.

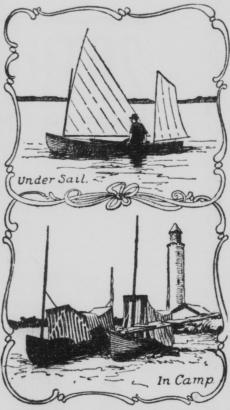

The American Canoe association has done much for the advancement of canoeing and for the benefit of the canoers. The wielders of the glistening paddle have much for which to thank the association. During the summer the American Ca-

noe association will hold a two days' meet at Buffalo. The races are to occur June 24 and 25 on the Delaware park

The schedule of events arranged for the Buffalo meet is as follows:

1. Tandem, single blade, half mile, with turn. Single, double blade, half mile, with turn. 3. Relay, single blade, three-quarter mile over

The American Canoe association was organized in 1880 at a convention of canoeists held at Crasbyside park, Lake George, N. Y. At present the membership is about 2,000. Its object is to unite all amateur canoeists for purposes of pleasure, health or exploration by means of meetings for business, paddling, sailing and racing and by keeping logs of voyages, records of waterways and routes, details, drawings and dimensions of boats and

collections of maps, charts and books. The association is in five divisions, as follows: Atlantic, comprising the middle Atlantic seaboard; eastern, all New England states; western, Ohio, Indiana, Illinois, Iowa, Michigan, Wisconsin and Minnesota; central, all the United States outside of Atlantic, eastern and western divisions; northern, all of Canada.

Many of the club owners of the National organization fail to see the importance of the ruler of the play. They are not only hurting the game, but they are depriving themselves of increased gate receipts by their indifference.

Ban Johnson, the president of what might be termed the National league's "nightmare," has worked his way up from the bottom of the baseball ladder, and he probably understands more about the inside workings of the game than any other man connected with the National league, if we except possibly James Hart of Chicago. cently, and they all say the same thing. They are given implicit instructions to carry out the rules, and when they do it they are called to account by some particular club owner whose favorite player has had his corns trodden upon by an umpire in the strict discharge of his duty.

There never was a better umpire in this country than Lynch, who knew baseball from beginning to end, and the players one and all respected him. Lynch was always fair and never played favorites. He was wanted for that reason by clubs when they were away from home simply because they knew that Lynch was entirely impartial, and no matter how much the mob howled he gave each decision as he saw it regardless of the consequences. But when it came to a pinch the club owners refused to support Lynch, and he gave up in disgust.

There is one umpire in the ranks, however, who says that he proposes to stick to the indicators until he is fired out. Emslie has been in harness for many years and does as well as any man could hope to do under the distressing circumstances connected with umpiring for the big league. Bob does not know what fear means, and he simply carries out the rules as they are laid down to him.

Emslie, under pressure, for he is not much of a talker, said a few days ago that he thought the club owners made a mistake when they gave up the double umpire system. He admitted that it was impossible to do good work under present conditions.

The rumpus between Andy Freedman and Umpire Nash would not have happened if two umpires had been on the field in that New York-Brooklyn forfeited game. Freedman has again thrown down the gauntlet to President Young and the other League owners, but nothing will come of it probably, for he has done the same thing before.

Much criticism has been heard about the respective pennant struggles in are of the opinion that the famous which the big leagues are engaged. Much concern is heard in the National camp about the fact that its American liberal restocking of streams and lakes rivals are so badly strung out. A by the government hatcheries scattermonth from now the conditions may be different.

A rather good story is going the rounds about a certain player who has yeoman's work during the last few made a good pitching record this year. He stipulated in his contract that he was not to play Sunday games, and | ters. he carried his point. This gave the moralists a chance, and they did not neglect it.

It will interest many to know that doing pitching exercises for the Philathis same player once played Sunday ball for a certain team under an assumed name.

went to France, declining a \$10,000 contract which stipulated that he must race on the Sabbath.

Billy Sunday, the famous old outfielder of the Chicago club, refused to play on Sunday and was sincere, as is proved by the fact that he abandoned baseball to become an evangelist.

The raid of the American league has certainly played havoc with some of the older clubs. Boston feels the loss of Stahl, Duffy and Collins mightily. The present aggregation does not look like the old team, and nobody realizes it more than Selee. McGinnity has been missed more than was expected in Brooklyn, and so has Jones and Cross. Cross' desertion has left a hole in the Brooklyn's infield which has broken the heart of the average fan in the City of Churches and trolley cars.

Cincinnati and Pittsburg seem to have weathered the storm in better shape than any of the others. I asked Hanlon the other day what team he thought was the strongest outside of his own, and he answered without hesitation, "Cincinnati." He had not, however, run up against the Pittsburg Pirates at that time.

While Matthewson, the New York pitcher, is undoubtedly the find of the present season, he cannot hope to keep up the pace. Aleck Smith, his catcher, sometimes called the "Broadway fashion plate" because of his fondness for fine raiment and his persistence in promenading Broadway in the theatrical district on sunny afternoons, says: "Matthewson is about the speediest pitcher I ever held, and I have held a lot of them in my time. I tell you, when one of those shoots goes a little wild it certainly jars."

I met the ever genial Patrick T. Powers, president of the Eastern league, one day recently. P. T. was all smiles and reports that his clubs are doing well. He predicts one of the most exciting struggles for the pennant in the history of the organization. He says reports reaching him from the west state that the Western association is doing equally well.

Powers believes that there has been a positive revival of interest in baseball all over the country this year and says it will continue to the end of the season.

The Eastern, Western and American leagues were clever enough to refuse to adopt the changes in the rules as arranged by the National league. The rule preventing the batsmen from taking first when hit with a pitched ball was so ridiculous that it did not have even a trial.

Calling a strike on a foul tip is causing more or less confusion, and all sorts of rulings have been made, especially when there are men stealing bases when the foul tip is made. The foul tip rule shortens the game, and that is about all.

BIGGEST MEET AT BUFFALO.

How Canoeing Is Adapted to All Parts of the Country-The American Canoe Association and Its Work-Exposition Races.

Canoeing is one of the many attractive outdoor pastimes that are engaging a deal of public notice nowadays. Canoeing is adapted to all conditions favorable to aquatic sports, and its followers are multiplying yearly.

One potent argument in favor of the advancement of the interests of the picturesque but serviceable craft is the adaptability of the canoe to use in many quarters where craft of greater draft would be put out of commission by lack of natural facilities. Shallow waters and rocky river beds are constant menaces to navigation by row and sail boats, but the Indian's graceful birch bark invention may glide unharmed with the aid of skillful manipulation through the trickiest of chan-

Its object is to unite all amateur canoeists for purposes of pleasure, health or exploration by means of meetings for business, paddling, sailing and racing and by keeping logs of voyages, records of waterways and routes, details, drawings and dimensions of boats and collections of maps, charts and books.

The association is in five divisions, as follows: Atlantic, comprising the middle Atlantic seaboard; eastern, all New England states; western, Ohio, Indiana, Illinois, Iowa, Michigan, Wisconsin and Minnesota; central, all the United States outside of Atlantic, eastern and western divisions; northern, all of Canada.

FINAL ARRANGEMENTS

For the Odd Fellows' Picnic at Rock Springs Park June 5-Large Delegations Coming.

Canton Rhodes Lodge No. 73, I. O. O. F., met last night and acted on one application which had been made for membership. Final preparations were also made for the picnic which will be held at Rock Springs park on June 5. The picnic will doubtless be one of

the largest ever held in this vicinity, as the various lodges within a radius of 75 miles have been invited. Communications already received from the different headquarters insure large delegations. Only the members of the Odd Fellows' lodge and their families will be expected to attend.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing

this Ointment is a wonder worker with all kinds of skin trouble. Attorney Jas. J. Brown, St. Ignace, Michigan, writes as follows: Dr. A. W. Chase Med. Co., Buffalo, N. Y .- Gents:- I

cannot refrain from expressing my acknowledgment for the relief I have felt from Dr. Chase's Ointment. For

40 years I was afflicted with a skin disease which was located in one spot-on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's Ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from Itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema. I teel now that I am cured, a word of recommendation is due from me. Yours truly.

Concerning the Chester mill the Pittsburg Chronicle Telegraph says: The work of dismantling the Chester plant of the American Sheet Cteel company is now going on and a large part of the machinery is being transferred to Vandergrift, Pa. The building will be removed to Wellsville, O., in sections and will there be set up. In it will be installed a large number of additions decided upon recently. The electric cranes will be removed from Chester to the Wellsville plant. Six new annealing furnaces will be added to the plant.

In addition a new sheet bar house is being erected to store the necessary bars required by the erection of a new and up-to-date bar mill. When the buildings are completed two sheet mills will be added to the plant, mak- Canaries, Parrots, Belgian ing it an 8-mill plant.

Hanoverton, June 1. - (Special.)-Wilson Davis, a carpenter, of this village, and Miss Nellie L. Treffinger, of Millport, were married here last night by 'Squire Winders. Davis had procured the license without the knowledge of the girl's father, and their marriage was the termination of an elopement of a somewhat exciting na-

Last evening Davis and his intended bride left the Treffinger home and ostensibly started for church. Instead of attending the services at the village chapel, however, the couple made their way toward Hanoverton. The elopement had been privately planned and the anxious Nellie had consented to follow her lover, notwithstanding she knew her father was likely to intercept them if their object was discovered.

The old gentleman was on the alert, as the fleeing couple had little more than gotten beyond the outskirts of the village until he was saddling a horse and preparing to give chase. He was distanced, however, and Davis and his fiance reached the 'squire's office ahead of the irate father and were quickly united.

The ceremony had been completed but a few minutes when the horse bearing the father, who, it is reported, carried a shotgun, was seen dashing into town. The northbound train was just then pulling into the depot and Mr. and Mrs. Davis quickly stepped aboard and made their escape. They started for Toledo, where Mr. Davis is employed.

POLITICAL MATTERS

The Democratic press of Ohio has been claiming for several weeks that Governor Nash would not be a candidate for a second term; that his health was such that he could not undergo the rigors of a campaign, and the air was full of pipe dreams in regard to the identity of the new Republican leader. It is now authoritatively announced that Governor Nash is a candidate for re-election, and latest reports from Columbus indicate that his health is improving and that he will soon be able to give the Democrats all the fight they want.

WELLSVILLE

A UNIQUE CLASS

THAT OF 1901 CLAIMS DISTING-TION IN SEVERAL WAYS.

Thirteen a Lucky Number-A Colored Girl One of the Graduates.

For the past two weeks the class of 1901 of Wellsville high school has been preparing the program for the commencement exercises next Tuesday evening. The first class in the twentieth century has many unique points about it. In the first place Two years ago the class was composed of thirteen members-twelve girls and one boy. Toward the end of the school year the boy left town, ostensibly on account of sickness, but many people believed it was on account of a fear of that unlucky thirteen.

The members of the class this year are taught to believe that thirteen is

Another unique thing about this class is that Miss Myrtle Lyons, one of its members, will be the first colored girl who ever sat on a commencement stage in Wellsville. Several years ago a colored girl was permitted to work for her diploma, but was not allowed to sit on the platform with the other graduates. The twentieth century comes in with the colored people on an equal with the white people as far as education goes.

Perhaps this is the first class of the school that has possessed such a talented musician as Henry L. Goetz. Mr. Goetz has spent a year in study at Berlin, and although he will not graduate with his class, he will take part in the program. Speaking of the program, it will be noticed that music abounds and will be an excellent feature. This is partly due to Miss Emily Brooke's direction. In the rehearsal of orations the Misses Ruby Mason and Dorothy Pierce have done much to better the program. The class motto is: "Honor in laboris porta manet," which means "Honor awaits at the gate of Labor.'

The last notable thing is that the commencement is to be held in the Frst Christian church. For several years it has been held in the Cooper Opera House. On account of repairs being made at the opera house it will be held in the church this year. This will insure the guests against a dirty

PLUGGING UP SEWERS

Health Officer Burgess Is Doing "Missionary" Work in the East End.

A sewer on Sycamore alley in the East End, which emptied in the creek at Mulberry street, was plugged up yesterday afternoon by Health Officer Burgess. Six families used the sewer and all are now left without any possible means of drainage.

Complaint has been made to the health authorities regarding the cesspool which formed at the mouth of the sewers and which created an obnoxious stench, and Mr. Burgess was compelled to abate the nuisance. There is no other outlet by which the families affected can attach their waste pipes, and all are in quandary as to what to do.

Another sewer on First avenue in the East End, which has also been declared a nuisance, is being stopped up by the health officer today.

A Scotch highland minister was very fond of commenting on each verse as he read it out. On reading the precept, "Walk circumspectly," he said: "Ye've all seen a cat, my brethren, walking on the top of a wall covered wi' broken bottles and bits of glass. See hoo it lifts ae fit and then anither fit and hoo slowly and carefully it puts it doon, to keep clear of the sharp bits of glass. And so, my brethren, in this warld o' snares and pitfalls, we should be like the cat on the wall-we should walk circumspectly."

Disappointed At Decision Of President McKinley And Cabinet.

CONSTITUTION NOT ACCEPTED.

Platt Amendment Is Not Adopted According to Views of United States Government - Cuban Conservative Said Acceptance Was Meant.

Havana, June 1.—The decision of accept the Cuban constitution as adopted by the Havana convention caused great surprise and keen disconvention who voted in favor of the constitution as adopted. Two leading conservatives who were interviewed on the subject said in substance that monies. they had reason to suppose that the constitution would be acceptable to Washington and that otherwise they would not have voted for the maprity report as submitted. They also pointed out that in order to avoid a possibility of rejection the majority report had been changed at the last noment by striking out the interpreation at the end of the clauses and tting therein the form of a resoluon by themselves, thus accepting the Platt amendment as passed by

"It is true," said one of the conservatives in question, "that the comnittee's interpretations of the planations of the Teller resolution. which were offered by Governor General Wood and Secretary Root, together with the Washington commission's report, were included with the Platt amendment as an appendix to the substitution, but when we voted on the report it was with but one purpose in view, namely to accept the Platt amendment."

Both delegates expressed regret that a misunderstanding had arisen and said they doubted that the convention would now reconsider its action, as the fight had been hot, the victory had been won by only one rote, and those who had tried to do their duty toward their country had been bitterly assailed as traitors and

Senores Capote and Tamayo had a long conference with General Wood last night. General Wood, in the course of a

Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease and giving the patient strength by building up the constitution and assisting nature in doing it's work. It is supposed that the cats were of the species known as Felis maniculata, a kind formerly found in north Africa, and probably tamed by the ancient Egyptians, from which we get our domesticated pussy.

As early as 1600 B. C. tablets recorded that cats were kept in the Egyptian temples as an object of worship.

Below is a story found in a recent book, "Talks With the Old English Cricketers," which prompts the reflection that "there were giants in those days" of the "old" cricketers.

A man who did a private business in athletic requisites at his home in Blackpool was one day approached by a man who asked him if he kept a full

supply of cricket requisites. "Certainly," was the response.

"Then," said the man gravely, "wrap me up a bottle of arnica, a paper of court plaster and an arm sling. I am going to play in a cricket match this afternoon against Jack Crossland."

SUCCESS AT TWENTY-TWO.

Owen Johnson's "Arrows of the Almighty" Has Scored a Hit.

A very good book by a very young Robert Murphy, formerly of Penrith, man is "Arrows of the Almighty," by W. Va., was killed on an Alabama rail- Owen Johnson. It is a good book because it is a serious and well written George Tourich lost his foot while work and shows a remarkable grasp of attempting to board an erie freight character and the logic of events, and it deserves the success that it is having This is all the more remarkable when one considers that it is the first serious literary work of its author, who is only 22 years of age.

Mr. Owen Johnson is the son of Robwhile working on the new theater ert Underwood Johnson, the poet, aubuilding at Junction Park, fell and was ther and associate editor of The Centuy Magazine. He was educated at the academy at Lawrenceville, N. J., where he established the Lawrenceville Liter-

ary Magazine, and at Yale. Lawrenceville is a celebrated "feeder" for Princeton, but Mr. Johnson chose Yale instead, where he was graduated last year. At Yale he obtained the highest university honors in letters, the chairmanship of the editorial board of The Vale Literary Magazine. The late William M. Evarts was one of the founders and first editor of that periodical. Physically Mr. Johnson is a slender young man, above medium height, with a frank and clean shaved boyish face.

In "Arrows of the Almighty" Owen Johnson attempts a task that has often wrecked older and more experienced writers. He tells the whole life history of his hero, an officer in the commissary department of the north during the civil war. The book covers a period of 50 years, from the twenties to the seventics. It includes an account of the contract scandals during the mighty struggle, and competent critics say that there is material enough for a book in this one episode of "Arrows of the Almighty." The same gentlemen agree that, although it is a very creditable piece of work, it has some minor faults. It needs condensation and shows want

of a sense of proportion. One of New York's literary papers says of "Arrows of the Almighty:" "For a student's work it is even remarkable. It is one of the few such works that merit serious attention. As yet Mr. Johnson has little sense of proportion. When he shall have understood the value of this in all work and shall have learned the art of condensation, he will undoubtedly find himself on the road to writing fiction of a high quality."

SEIZE THE OPPORTUNITY.

With a week's notice and with the prospect of important business propositions to be submitted for consideration, the board of trade meeting called for next Thursday evening should be a rousing one. The fact that the meeting had to be called off last evening on account of no quorum is no reflection on the organization or its officers. The date, by some error, was unfortunately set when the whole town had its time and attention fully occupied with the high school commencement. Next time, we believe, there will be a satisfactory attendance, and that all leading citizens will be there to show that they have public spirit and civic pride and are willing to lend a hand to advance the material welfare of the city. Now, if ever, is the time to make a good start in this direction. The opportunity is ripe; let it be embraced.

Several East Liverpool tradesmen are already employed at the pottery there and the proprietors were so impressed with their skill that they determined to induce other to go. The plant is a two-kiln affair, employing about 35 men. The climate in Golden is very fine, and is especially beneficial to those in ill-health.

Harry Extercamp, a kilnman, formerly employed at Cincinnati, accompanied Mr. Geijsbeek this afternoon, and it may be that the arrangements can be made in time to have the dipper go with the party.

Artie Fredie, a kilnhand at the C. C. Thompson plant, is at present being guyed by his fellow workmen. large speculative pool was also active in the stock and helped along the advance by manipulation. The buying of Southern railway was attributed to the same source, and confident predictions were heard that announcement would soon be made of Pennsylvania control in the company.

The street was full of well-defined rumors that a settlement had been agreed upon between the contending interests in Northern Pacific, which would result in even stronger conditions in the railroad world than at present. This was the underlying cause of the strength in the market, but the railroads in the southern region responded much more notably than those in the northern region. The so-called greater Missouri Pacific project retained its full forces as a factor. The decided strength of the United States Steel stocks also had a considerable influence. DUN'S REVIEW OF TRADE.

Other Features. New York, June 1.-R. G. Dun &

Co.'s Weekly Review of Trade, issued today, said in part:

hampered distributive trade to a conthe season in some lines rather unsatisfactory, the west and south report unchanged conditions, with operations well up to the recent average. The labor situation is a little brighter. Many strikes have been settled, and others are expected to terminate shortly.

Iron and steel mills are working at full capacity, and more new plants have been put in operation. Quotations are well maintained, without any effort to secure advances. Farming machinery is a feature of the domestic business, and there is no sign of decrease in the export movement of these products, which has attained enormous proportions. Rails are also going out freely to Australia and South America. Railways are unable to secure sufficient freight cars and other supplies, while structural work proceeds briskly with little interruption from labor controversies.

Extended holidays abroad and a short one in this country have tended CO. to make the grain markets unusually quiet, while corn has had the added drawback of hesitation among traders who have not yet recovered from the effects of manipulation in the May option. Foreign purchasers were driven out of this market by as good as it looks.

quotations. inflated tion in wheat is quickly followed by recovery, and much support is found in gloomy reports from growing sections. Insufficient moisture and low temperature are the chief causes of complaint, and injury from insects is also rumored, but there is always more or less loss through these influ ences, and the splendid condition earlier in the season gives reason to hope for an abundant yield. Carpets and upholsteries improve, and in at \$4.65. staple clothing woolens there is more activity. This brings out raw wool more freely, but there is not sufficient demand to advance prices in the face of heavy stocks and a large new clip coming forward. In fact, the accumulation of supplies has had a distinctly depressing influence, and in the Philadelphia market quotations are perceptibly easier. The decline wools, although not more than a cent in any grade.

Bieber, Cal., June 1.—Details have been received here of the lynching of give men at Lookout, Modoc county. The lynched were Calvin Hall, 72 years of age; his three half-breed sons, Frank, James and Martin, aged respectively 26, 19 and 16, and B. D. Yantis, aged 2. The men lynched had been suspected of petty stealing for some time. They were arrested Saturday of last week. Stolen property was found in the houses and on the premises of Hall and Yantis, Sunday and for several days following.

The charge against the elder Hall was petty larceny, for stealing forks, hence he was allowed to go about on his own recognizance. The charges against the others was burgsary and their examinations had been set for June 3. They were held in custody, as they were unable to furnish bail in the sum of \$300. Pending their examination they were being guarded in the Lookout hotel by Constable Carpenter, assisted by R. Nichols, J. W. Brown and S. BOWSER, THE WIZARD.

HE MAKES A WONDERFUL DISCOVERY IN WIRELESS TELEGRAPHY.

The Great Scientist Explains His Invention to Mrs. Bowser and Then Makes a Few Experiments, With Surprising Results.

[Copyright, 1901, by C. B. Lewis.]

Mr. Bowser had a look of triumph in his eyes as he reached home the other evening, a look to tell even the family cat that he had picked up a pointer He Was Strung Up Before the Place with millions in it during the day and was bent on an after dinner experiment. Mrs. Bowser groaned inwardly Reached-One of the Victims Was as she realized it; but, though he anticipated being questioned at table, she held her peace and waited for developments. It was after the finish of the meal and with an air that told of victory that he began:

"A woman doesn't know much, of course, just enough to enable her to dodge a cable car or a butcher cart,

"HELLO THERE, BRIDGET O'HALLAHAN!" but perhaps you have heard of the new idea in science-wireless telegraphy?" "I have seen it mentioned in the pa-

"Then you know what the idea is. It is to telegraph without wires, or by sound waves of the human voice. The human voice, as I may explain to you, does not issue from the throat like a piece of turnip, but in waves following each other so closely that it is hard to detect the intervals between them. For instance, my voice as I now speak to you seems to string out like a rope,

"Yes; I was just thinking how much

"Thanks. Ignorance always tries to were hanged on the south side of the hide behind sarcasm. However, there are scores of breaks or intervals in my voice just the same, only your ears don't detect them."

"And what if they don't?"

"Ah, there is the key of the whole thing. Two or three people are working at it, but they have just missed it as yet. They don't go on the right principle. They forget that the last sound or wave must be heavy to drive tance."

"And so some one has started you off tional acceptance of 450,000,000 taels on that fad?" she queried as he bal-

"Never, sir, and if it was you that said my poor mother was dead, and lived in the family of a villain yet and every remedy known, and had never with the help of heaven I never will."

He spent 15 minutes trying to explain the affair to her, but in the end she insisted on taking a five mile street car ride to see if her mother was alive or dead, and she hinted that she lief, and I afterward bought a fifty might not return for a day or two, cent bottle, which I can truthfully say When she had retired to her domain, gave me more relief than anything I Mr. Bowser consoled himself by say- have ever tried-R. "I ought to have remembered that she didn't know putty from pepper. You must admit that my system is a success, however."

"Yes, your yell could have been heard a block away," replied Mrs. Bowser, "but I don't consider it a real test at all. You'd have to have a roar like 40 bulls to drive the sound waves 10 or 15 miles."

"That shows all you know about it. How far is it from our back door to the rear of the flat fronting the next

"A hundred feet maybe."

"Well, I know a man named Jones on the third floor. I'll go down into the back yard and send him a message, and you'll hear no 40 bull voices

Three minutes later Mr. Bowser had reached his station. In a voice hardly above a whisper he sent his clear the track wave ahead by calling: "Jones! Jones! Ah, there, Jones!

Say, Jones, do you hear me?"

If Jones did, there were no signs of it, but Mr. Bowser went on with the

Then he lifted his voice a trifle for the driving wave, and the whole thing was supposed to be rolling in on Jones through wall or window when an old tin pail struck Mr. Bowser in the stomach, a piece of coal found a resting place on his chin, and bottles and cans hit all around him and voices cried out:

"Peg him ag'in! It's old Bowser out throwing poison to our cats and dogs!" "Come into the house with your wire killed dead!" shouted the cook as she reached outdoors for him, and Mr. Bowser felt the wind of an old demity. FOR MOTHERS.

The period immediately following child-birth is fraught with many dangers. The strength has been used in the painful ordeal through which the mother has passed and she finds herself helpless and weakened. Many mothers, like Mrs. Ford, date the beginning of their illness from the birth of their child. Indeed the frequent spectacle of a healthy young woman becoming a chronic invalid after motherhood is one of the tragedies of life. All this is unnecessary, when Wine of Cardui is obtainable. It rehabilitates the shattered nervous system, strengthens the organs and ligaments, and

re-establishes a healthy, natural condition, saving years of chronic sickness and suffering. Wine of Cardui taken just before confinement will render the ordeal comparatively painless. It will re-enforce and strengthen the organs for their work. For every trying crisis in a woman's life, Wine of Cardui is the medicine to take. Ask your druggist for Wine of Cardui and take no substitute. If one is offered send \$1.00 for a bottle to the Chattanooga Medicine Company, Chattanooga,

ON SPECIAL STEEL SCALES.

Majority of Delegates Instructed Their Officers to Try and Secure a Meeting-Shaffer Said Combine Should Not Be Adjudged Hostile.

Milwaukee, Wis., June 1.—The first significant action of the Amalgamated association convention on the relations of the association with the United States Steel corporation was taken in convention, when, after a strenuous debate, a resolution was adopted empowering the officers of the association to seek a general conference with the officials of the Morgan combine for the adjustment of the special steel scales adopted, in a number of the Morgan mills, including the W. Dewees Wood plant at McKeesport.

At first the resolution was vehe mently opposed. President Shaffer supported it strongly. He opposed the new power in the iron and steel trades being adjudged hostile to labor in advance. His speech was virtually a pledge on his part that the securing of some concession from President Schwab's organization was by no means impossible

The convention continued on the fron scales. The report of the wage ommittee was changed but little. The boiling scale was completed, and he scales following were taken up iatim. The advance throughout iron list wil follow closely the illing advance. Five per cent is the

There is one point where the Amercan league is beating the National league all along the line, and every sportsman in the country is glad of itthat is, in the protection of its um-

Many of the club owners of the National organization fail to see the importance of the ruler of the play. They are not only hurting the game, but they are depriving themselves of increased gate receipts by their indifference.

Ban Johnson, the president of what might be termed the National league's "nightmare," has worked his way up from the bottom of the baseball ladder, and he probably understands more about the inside workings of the game than any other man connected with the National league, if we except possibly James Hart of Chicago. I have talked with several of the veteran umpires re-

ently, and they all say the same thing. They are given implicit instructions to carry out the rules, and when they do it they are called to account by some particular club owner whose favorite player has had his corns trodden upon by an umpire in the strict discharge of his duty.

There never was a better umpire in this country than Lynch, who knew baseball from beginning to end, and the players one and all respected him. Lynch was always fair and never played favorites. He was wanted for that reason by clubs when they were away from home simply because they knew that Lynch was entirely impartial, and no matter how much the mob howled he gave each decision as he saw it regardless of the consequences. But when it came to a pinch the club owners refused to support Lynch, and he

gave up in disgust. There is one umpire in the ranks, however, who says that he proposes to stick to the indicators until he is fired out. Emslie has been in harness for many years and does as well as any man could hope to do under the distressing circumstances connected with umpiring for the big league. Bob does not know what fear means, and he simply carries out the rules as they are laid down to him.

Emslie, under pressure, for he is not much of a talker, said a few days ago that he thought the club owners made a mistake when they gave up the double umpire system. He admitted that it was impossible to do good work under present conditions.

The rumpus between Andy Freedman and Umpire Nash would not have happened if two umpires had been on the field in that New York-Brooklyn forfeited game. Freedman has again thrown down the gauntlet to President Young and the other League owners, but nothing will come of it probably, for he has done the same thing before.

Much criticism has been heard about the respective pennant struggles in which the big leagues are engaged. Maine game fish are increasing in num-Much concern is heard in the National camp about the fact that its American rivals are so badly strung out. A by the government hatcheries scattermonth from now the conditions may be different.

A rather good story is going the rounds about a certain player who has made a good pitching record this year. He stipulated in his contract that he was not to play Sunday games, and ters. he carried his point. This gave the moralists a chance, and they did not neglect it.

It will interest many to know that doing pitching exercises for the Philathis same player once played Sunday delphia team, carries a piano around ball for a certain team under an as-

sumed name. "Majer" Taylor, the colored bicycle days in the baseball field says he has rider, is one of the few athletes who are seen players carrying birds, dogs and sincere on this Sunday question. He even other conceivable hobbies around

went to France, declining a \$10,000 contract which stipulated that he must race on the Sabbath.

Billy Sunday, the famous old outfielder of the Chicago club, refused to play on Sunday and was sincere, as is proved by the fact that he abandoned baseball to become an evangelist.

The raid of the American league has certainly played havoc with some of the older clubs. Boston feels the loss of Stahl, Duffy and Collins mightily. The present aggregation does not look like the old team, and nobody realizes it more than Selee. McGinnity has been missed more than was expected in Brooklyn, and so has Jones and Cross. Cross' desertion has left a hole in the Brooklyn's infield which has broken the heart of the average fan in the City of Churches and trolley cars.

Cincinnati and Pittsburg seem to have weathered the storm in better shape than any of the others. I asked Hanlon the other day what team he thought was the strongest outside of his own, and he answered without hesitation, "Cincinnati." He had not, however, run up against the Pittsburg Pirates at that time.

While Matthewson, the New York pitcher, is undoubtedly the find of the present season, he cannot hope to keep up the pace. Aleck Smith, his catcher, sometimes called the "Broadway fashion plate" because of his fondness for fine raiment and his persistence in promenading Broadway in the theatrical district on sunny afternoons, says: "Matthewson is about the speediest pitcher I ever held, and I have held a lot of them in my time. I tell you, when one of those shoots goes a little wild it certainly jars."

I met the ever genial Patrick T. Powers, president of the Eastern league, one day recently. P. T. was all smiles and reports that his clubs are doing well. He predicts one of the most exciting struggles for the pennant in the history of the organization. He says reports reaching him from the west state that the Western association is doing equally well.

Powers believes that there has been a positive revival of interest in baseball all over the country this year and says it will continue to the end of the

The Eastern, Western and American leagues were clever enough to refuse to adopt the changes in the rules as arranged by the National league. The rule preventing the batsmen from taking first when hit with a pitched ball was so ridiculous that it did not have even a trial.

Calling a strike on a foul tip is causing more or less confusion, and all sorts of rulings have been made, especially when there are men stealing bases when the foul tip is made. The foul tip rule shortens the game, and that is about all.

Fishermen Throughout the Country Enjoying Good Sport.

Fishermen are now in the midst of the season's sport. From Maine to Florida, from New York to California, the reels are clicking and the lines are whirring.

Tuna fishing on the Pacific coast has assumed very gratifying proportions to the western votaries of the rod and reel. Several unusually large catches have been reported. The southern devotees of Izaak Walton are also in luck. Red snappers are very plentiful in many regions, and the gamy fish are biting voraciously. Hundreds of enthusiastic fishermen have flocked to the Florida haunts of the red snapper.

The streams about Philadelphia, Chicago and St. Louis are being well patronized. Members of some of the fishing clubs say that the fish are rising to flies better than has been the case for several years.

BIGGEST MEET AT BUFFALO.

How Canoeing Is Adapted to All Parts of the Country-The American Canoe Association and Its Work-Exposition Races.

Canoeing is one of the many attractive outdoor pastimes that are engaging a deal of public notice nowadays. Canoeing is adapted to all conditions favorable to aquatic sports, and its followers are multiplying yearly.

One potent argument in favor of the advancement of the interests of the picturesque but serviceable craft is the adaptability of the canoe to use in many quarters where craft of greater draft would be put out of commission by lack of natural facilities. Shallow waters and rocky river beds are constant menaces to navigation by row and sail boats, but the Indian's graceful birch bark invention may glide unharmed with the aid of skillful manipulation through the trickiest of chan-

To the inland inhabitant canoes are invaluable. By their means he can avail himself of delightful outings on brooks, lakes and rivers that would otherwise be denied to him.

The American Canoe association has done much for the advancement of canoeing and for the benefit of the canoers. The wielders of the glistening paddle have much for which to thank the association.

During the summer the American Canoe association will hold a two days' meet at Buffalo. The races are to occur June 24 and 25 on the Delaware park

The schedule of events arranged for the Buffalo meet is as follows:

1. Tandem, single blade, half mile, with turn. Single, double blade, half mile, with turn. 3. Relay, single blade, three-quarter mile over

4. Tail end, single blade, one-quarter mile. 5. Club fours, single blade, half mile, with turn

Its object is to unite all amateur canoeists for purposes of pleasure, health or exploration by means of meetings for business, paddling, sailing and racing and by keeping logs of voyages, records of waterways and routes, details, drawings and dimensions of boats and collections of maps, charts and books.

The association is in five divisions, as follows: Atlantic, comprising the middle Atlantic seaboard; eastern, all New England states; western, Ohio, Indiana, Illinois, Iowa, Michigan, Wisconsin and Minnesota; central, all the United States outside of Atlantic, eastern and western divisions; northern, all of Canada.

The champion Vesper crew of Philadelphia, as it rowed at Paris last year, is to be broken up, and the effect of the absence of two or three good men from their eight oared shell will be awaited with interest. James B. Juvenal, who is one of the best oarsmen in the country, having won honors throughout the United States and in Canada, has made arrangements to coach the Arundel Boat club of Balti-

FINAL ARRANGEMENTS

For the Odd Fellows' Picnic at Rock Springs Park June 5-Large Delegations Coming.

Canton Rhodes Lodge No. 73, I. O. O. F., met last night and acted on one application which had been made for membership. Final preparations were also made for the picnic which will be held at Rock Springs park on June 5.

The picnic will doubtless be one of the largest ever held in this vicinity, as the various lodges within a radius of 75 miles have been invited. Communications already received from the different headquarters insure large delegations. Only the members of the Odd Fellows' lodge and their families will be expected to attend.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing much comment.

all kinds of skin trouble. Attorney Jas. J. Brown, St. Ignace, Michigan, writes as follows: Dr. A. W. Chase Med. Co., Buffalo, N. Y.-Gents:- I

cannot refrain from expressing my acknowledgment for the relief

I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot-on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's Ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from Itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema. I teel now that I am cured, a word of recommendation is due from me.

Yours truly, JAS. J. BROWN.

CHESTER EXCITED

OVER RUMORED ORDER TO STOP DISMANTLING MILL.

It Turns Out That the Order Applied Only to the Annealing Furnace.

Chester was stirred again last night by a rumor that the force of men who have been engaged at the work of dismantling the Chester rolling mill had been ordered to stop their operations at once.

The statement was immediately snatched up and twisted into all manner of stories. One had it that the workmen were to start immediately at the task of replacing the equipthat had been taken out, and that within the next 60 days the plant

would be put in operation. For several weeks past the force has been enlarged from time to time. until at present time there are a few less than a hundred men at work, and more will be added if they are available.

A reporter called at the mill this morning and found a scene of unusual activity. Inquiry elicited the information that the only order received there recently was issued yesterday. and was to the effect that work upon the razing of an annealing furnace should be suspended temporarily. There was plenty of work on other portions of the equipment, and three carloads of the stuff were sent out this morning.

Manager Brookman, of Wellsville, was seen and stated that the work would be proceeded with without interruption as far as he knew, and Chester will again be doomed to disappointment

Concerning the Chester mill the Pittsburg Chronicle Telegraph says: The work of dismantling the Chester plant of the American Sheet Cteel company is now going on and a large part of the machinery is being transferred to Vandergrift, Pa. The building will be removed to Wellsville, O., in sections and will there be set up. In it will be installed a large number of additions decided upon recently. The electric cranes will be removed from Chester to the Wellsville plant. Six new annealing furnaces will be added to the plant.

In addition a new sheet bar house is being erected to store the necessary bars required by the erection of a new and up-to-date bar mill. When the buildings are completed two sheet mills will be added to the plant, mak- Canaries. ing it an 8-mill plant.

HIS Looks Were Deceptive.

The late Mr. Justice William O'Brien, as is pretty generally known. was not a tailor's model, and when going on a long railway journey his attire was even-more neglected than usual, says London M. A. P. Waiting one day for his train to leave Cork, he wandered into the first class refreshment room, his threadbare and faded coat looking the more remarkable when in contrast with the dress of the smart set frequenting the place. "Can ruled behind the bar.

The lady eyed him sharply and superciliously and then snapped out: "Yes, but it's tuppence a glass here.

You'll get it for a penny in the third "Well," returned the judge as amiably as possible, "I think I'll have a

He took his milk and walked out with an unruffled countenance. But when that young lady heard from some gentlemen who were standing at the bar and knew the judge who her customer was she didn't feel very well. She tried to explain that she thought he was one of those "old farmer fellows who'd stop arguing about the
